My PCR password: EuroPCR2022

Pod Masters T.ATTISANO ; G.GALASSO

SPECIAL GUEST: RAOUL BONAN (Heart Institute of Montreal)

Dear all,

as you well known, a pod is a group of physicians, fellows, nurses and/or allied professionals, etc- who gather at their own initiative to follow the Course together.

They interact with the programme and teams in Paris via the chat.

We will have the opportunity to exchange face-to-face with their peers and other participants of the Pod.

The Pod will gain visibility of social media and our website.

All of you, registered as Pod Participant will receive the same benefits than the online individual participants:

- Access to all on-demand content for 3 months
- Access to the PCR-EAPCI Textbook and the PCR Trial book during the Course period
- Claim CME credits

Main Topics to be covered: Coronary interventions and Structural interventional for Valvular Disease

Selected sessions

17/05
