Show your talent! Call for cases: www.mvsic.eu

Milan

can surely be considered one of the cradles of transcatheter valve interventions because of some outstanding surgical and interventional operators, inventors, and scientists. MVSIC (Milan Valve and Structural Interventions Course) seeks in a very practical way to show in its third edition modern structural heart interventions through popular formats: **Absolutely Live:** Live case transmission from top notch centers. **Invited Cases by the Maestros:** Experts present their most challenging cases. **MVSIC's Got Talent:** A real competition to find out who will be next generation Maestros. **Accessorize it!:** Because you need technique but you also need tools, whats is up and new from the Industry. **MTV MVSIC Training Village:** small group meetings with experts facing complex or difficult cases. **AperiTAVI:** smart conversation with friends about structural heart disease and procedural complications
